

Sohan Chitte

Gen AI / Backend Developer

sohan.chitte23@gmail.com | +971 502238768 | Dubai, UAE | linkedin.com/in/sohan-chitte/ | github.com/sohancs

PROFESSIONAL SUMMARY

Experienced Backend Developer with 8+ years of experience and specializing in **GenAI solutions**. Proven ability to build **LLM-driven applications, multi-agent workflows, and RAG based chatbots**. Focused on turning conventional backend services into smart, autonomous GenAI solutions that drastically enhance speed, decision-making, and user experience.

SKILLS

Generative AI: Q/A Chatbots, AI Agents, Agentic Workflows, LLMs (OpenAI, Llama, Gemini etc), RAG, Prompt Engineering, LangChain, LangGraph, MCP.

Languages: Python, Java, Typescript, Javascript

Frameworks: Spring Boot, Spring MVC, Fast API

Databases: Oracle, MySQL, PostgreSQL

Cloud: AWS, Azure, GCP

PROFESSIONAL EXPERIENCE

DP World, Software Developer

08/2023 – Present | Dubai

- Built a **multi-agent PortOps Assistant** (Llama-3.2) that routes natural-language queries to TOS, WMS, Customs, BRN/BOL & Billing APIs, reducing data lookup time **40%** and accelerating supervisor decisions by **35%**.
- Implemented a **schema-aware AI Agent** (LangGraph + GPT-4o-mini) generating and validating SQL across **15+ Oracle tables**, cutting manual reporting by **60%** while enforcing DP World data-governance by **strict guardrails**.
- Delivered a **RAG system** (text-embedding-3-large + Azure AI Search) over vessel operation manuals, stevedoring SOPs, customs rules & tariffs, achieving **95% answer accuracy** and reducing control-room dependency **50%**.
- Containerized & optimized GenAI backend** (FastAPI + Agents), reducing Docker size **1.5GB → 600MB (60%)**, improving deployment speed and enabling scalable rollout on **Azure Container Apps**.
- Built a dynamic prompt-management framework** enabling **50+ prompts to update with zero code changes**, auto-syncing with Oracle schema changes and reducing maintenance **80%**.
- Independently developed backend services** (Java 21) with REST APIs, JWT auth, auditing, and encryption for HHT mobile app used by **100+ operators & supervisors**, processing **~5,000 transactions/month** with **99.9% uptime**.

Qualcomm Technologies, IT Software Developer

11/2021 – 08/2023 | Hyderabad, India

- Implemented IT Security recommended security headers across all applications, achieving **100% Qualcomm security compliance with zero defects**.
- Implemented XSS mitigation code** across all apps, reducing vulnerability risk to **0%**.
- Supported weekend downtime activities** of all SRS apps, including restarts and arises production issues resolution, maintaining **99.9% uptime**.
- Coordinated with 4+ cross-functional teams** resulting in a smoother delivery and positive user feedback.

Cognizant Technology Solutions, Full Stack Developer

09/2020 – 10/2021 | Pune, India

- Integrated 7+ microservices** (fraud check, credit scoring, billing) for Credit Suisse client and performed **transactional updates across multiple tables**, ensuring **>98% data consistency**.
- Built backend services for new credit card order workflow**, which involves multiple external API calls and table updates, reducing latency by **30% using caching mechanism**.
- Developed reusable UI components with lazy loading**, improving **page load speed 50%** for end users.

Zensar Technologies, Software Engineer

01/2019 – 09/2020 | Pune, India

- Modernized Cisco IAPM UI by migrating from AngularJS to Angular 8**, improving usability for 1000+ users and **reducing page load time by ~40%**.
- Developed REST services with Spring Data JPA** to estimate repository operations times based on historical Enforce/Update data, increasing **planning accuracy by 30%**.
- Built reusable Angular components with lazy loading**, improving frontend maintainability by **~35%**.

Tata Consultancy Services, System Engineer

07/2017 – 12/2018 | Pune, India

- Built reusable service modules and utility classes**, reducing development effort for future enhancements by **20–25%**.
- Wrote and optimized MySQL queries**, reducing average data retrieval time by **~30% using indexes**.
- Monitored application logs and performance**, resolving issues proactively to maintain **99.5% uptime** for critical services.

EDUCATION

B. TECH IN Computer Science & Engineering,

Shri Guru Gobind Singhji College of Engineering – Nanded, India
CGPA - 7.5

07/2013 – 05/2017 | Nanded, India

AWARDS

- Got **FSE(Full Stack Software Engineer) Star Award** for Q2 2021 with **Cognizant Technology Solutions**.
- Secure Application Developer Certificate By Veracode** in 2024 with **DP World**.
