

Sohan Chitte

Senior Backend Engineer

sohanchitte5@gmail.com | +971 502238768 | Dubai, UAE | linkedin.com/in/sohan-chitte | github.com/sohancs

PROFESSIONAL SUMMARY

Senior Backend Engineer with 9 years of experience building scalable enterprise applications using **Java, Spring Boot, and Microservices**, with experience across global organizations including **DP World(Dubai)** and **Qualcomm**. Proven track record of delivering high-performance backend systems, improving operational efficiency by **30%** and maintaining **99.9%** uptime in production environments. Strong expertise in **designing secure, production-grade APIs and optimizing** large-scale backend operations. Additionally built production GenAI systems at DP World including a **Multi-agent PortOps Assistant and a RAG pipeline** achieving **90%** answer accuracy — combining deep backend engineering with hands-on AI to deliver measurable business impact.

SKILLS

Languages: Java 8 & 21, Python, TypeScript, JavaScript, SQL, PL/SQL

Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Microservices, FastAPI, Hibernate, REST API, Servlet, JSP, Struts, Ibatis

Cloud & DevOps: Azure DevOps, CI/CD, Docker, AWS, Kubernetes, Nginx, JBoss Server, Jenkins, Git

Databases: Oracle DBMS, MySQL, PostgreSQL, MongoDB, Elasticsearch

Generative AI: Q/A Chatbots, AI Agents, Agentic Workflows, LLMs, RAG, Prompt Engineering, LangChain, LangGraph

PROFESSIONAL EXPERIENCE

DP World, Senior Backend Engineer
Dubai, UAE

08/2023 – Present

- Designed and developed scalable backend services using **Java 21, Spring Boot, and Microservices** with JWT authentication, request auditing, and data encryption for the HHT mobile app — serving **200+ operators & supervisors**, processing **~5,000 transactions/month** at **99.9% uptime**.
- Implemented automated **job schedulers** for General Cargo applications notifying 50+ stakeholders on gear/equipment usage, cargo delays & billing advices, etc — reducing manual follow-up by **~35%**.
- Took full SDLC ownership of 3 major releases — requirements through go-live and production stabilisation — achieving **zero critical post-release defects**.
- Built a **multi-agent PortOps Assistant** (Llama-3.2 + LangGraph) routing natural-language queries to TOS, WMS, Customs, BRN/BOL & Billing APIs — reducing data lookup time **40%** and accelerating supervisor decisions **35%**.
- Delivered a **RAG system** (text-embedding-3-large + Azure AI Search) over vessel operation manuals, stevedoring SOPs, customs rules & tariffs — achieving **90% answer accuracy** and reducing control-room dependency **50%**.
- Containerized & optimized GenAI backend, reducing Docker image size by **60%**, enabling scalable rollout on **Azure Container Apps**.

Technology: Java 21 · Python · Spring Boot · FastAPI · LangGraph · LangChain · Oracle DBMS · Azure (Container Apps, AI Search, DevOps) · Docker · JBoss · Hibernate · Ibatis · Jasper Reports · Git · Maven

Qualcomm Technologies, IT Software Developer
Hyderabad, India

11/2021 – 08/2023

- Implemented IT Security recommended security headers across all applications, achieving **100% Qualcomm security compliance** with **zero defects** at QA sign-off.
- Implemented XSS mitigation code across all SRS applications, reducing vulnerability risk to **0%**.
- Supported weekend downtime activities including new features rollouts and production issue fixes, maintaining **99.9% uptime** SLA.
- Coordinated with **4+ cross-functional teams**, resulting in smoother delivery and positive stakeholder feedback.

Technology: Java 8 · Spring Boot · Angular · Oracle · Docker · Kubernetes · Nginx · Microservices · JPA · Hibernate · Jenkins · SOLR · Splunk · Git

Cognizant Technology Solutions, Full Stack Developer
Pune, India

09/2020 – 10/2021

- Integrated **5+ microservices** (fraud check, credit scoring, billing) for Credit Suisse Bank, ensuring **>99% data consistency** across all transactional workflows.
- Built backend services for the credit card order workflow involving multiple external API calls and table updates, reducing latency by **30%** using a caching mechanism.
- Developed reusable UI components with lazy loading, improving page load speed by **50%** for end users.

Technology: Java 8 · Spring Boot · Angular 8 · Oracle · JPA · Microservices · REST · SOAP · Docker · Git · Jenkins · Maven

Zensar Technologies, Software Engineer
Pune, India

01/2019 – 09/2020

- Modernized Cisco IAPM UI by migrating from AngularJS to Angular 8, improving usability for **1,000+ users** and reducing page load time **~40%**.
- Developed REST services with Spring Data JPA to estimate user repository operation times from historical Enforce/Update data, increasing planning accuracy **30%**.
- Built reusable Angular components with lazy loading, improving frontend maintainability **~35%**.

Technology: Java 8 · Angular 8 · Spring Boot · Spring MVC · JPA · Oracle · TypeScript · Git

Tata Consultancy Services, System Engineer
Pune, India

07/2017 – 12/2018

- Built reusable service modules and utility classes, reducing development effort for future enhancements **20–25%**.
- Wrote and optimized MySQL queries using indexes, reducing average data retrieval time **~30%**.
- Monitored application logs and performance, resolving issues proactively to maintain **99.5% uptime** for critical services.

Technology: Java 7 · JSP · Servlet · JDBC · MySQL · SVN · Eclipse

EDUCATION

B.Tech in Computer Science & Engineering

07/2013 – 05/2017

Shri Guru Gobind Singhji College of Engineering & Technology, Nanded, India (CGPA: 7.5 / 10)

CERTIFICATES & AWARDS

-
- **Google AI Agents Intensive Course Certification — Dec 2025**
 - **Secure Application Developer Certificate** by Veracode — DP World, 2024.
 - **FSE (Full Stack Software Engineer) Star Award Q2 2021** — Cognizant Technology Solutions.
